()

3. Read the following passage carefully and answer the following questions that follow:

Infants who spend long periods in front of the television may be at greater risk of developing medical problems later in life. It includes premature puberty, sleep disturbances, and metabolic disorders, according to a recent report. The famous psychologist Aric Sigmen said many studies were beginning to emerge that suggest spending long periods in front of a TV screen, whether a television or a computer, may have damaging physiological effects.

One study, by a team from Florence university, found that watching television and playing computer games lowered the amount of the sleep hormone, melatonin, children produced, an effect that could bring an earlier puberty. There may be attention deficit disorder, obesity, short sightedness and Alzheimer's disease. Children aged between 11 and 15 now spend 55 per cent of their waking lives in front of the screen amounting to 53 hours a week. More than half of three-year-olds now have a television set in their bedroom.

1. Mention three later ailments to be developed in infants which are due to spending long periods in front of the television?
2. What is the general pastime of children between 11 and 15 now?
